

Origo™ Mig C170 3ph/C200 3ph/C250 3ph Three-phase welding machines for everyone

The Origo™ Mig C170 3ph/C200 3ph/C250 3ph are three-phase step regulated welding power sources for MIG/MAG welding. A built-in wire feeder and the low weight of the units make them perfect, practical solutions for farmers, repair shops and light production users.

MIG/MAG welding

Origo™ Mig can be used with both conventional solid wire and self-shielding cored wire. It is designed for welding of steel, stainless steel and aluminium as well as for brazing.

Wire diameters from 0.6 mm up to 1.2 mm can be used depending on type of machine.

Easy to use

The units are equipped with multi-step voltage switches and potentiometers for wire speed adjusting to enable easy setting of welding parameters.

It is possible to adjust burnback time and to set spot welding time in Origo™ Mig machines.

The units are fan-cooled and equipped with thermal overload protection.

As an option the Origo™ Mig C170 3ph/C200 3ph/C250 3ph can be equipped with V/A digital meter and transformer for CO₂ heater.

Torch included

Each machine is equipped with a gas-cooled MXL™ Torch (MXL™ 200, MXL™ 270). They have ergonomic handles.

They have spring loaded contact pins in the central connector.

Optimum cooling of the torches gives them extended life time of the swan necks and the wear parts. You can choose gas nozzles in 3 different versions, standard, straight and conical. This provide maximum flexibility and an optimum life time.

Applications

- **Auto-repair**
- **Light metal fabrication**
- **Transport**
- **Education**
- **Household and furniture**
- **Tack welding**

- **Easy change of polarity** - it may be used with both conventional solid wire and self-shielding cored wire (C200 3ph/C250 3ph).
- **Easy setting of welding parameters** - welding machines for everyone
- **MXL™ Torches™** - designed to provide the utmost in convenience and versatility
